In re Application of :
Norman Van Meeteren :
Serial No.: 10/764,370 : PETITION DECISION
Filed: January 23, 2004 :
Attorney Docket No.: 1379-012 :

This is in response to the petition under 37 CFR § 1.59(b), filed December 14, 2006, to expunge information from the above identified application. This application has been allowed.

Petitioner requests that the Reply to Request for Information Under 37 CFR 1.105, and all attachments thereto, submitted to the Patent Office on November 9, 2006, be expunged from the record. Petitioner states either: (A) that the information contains trade secret material, proprietary material and/or material that is subject to a protective order which has not been made public; or (B) that the information submitted was unintentionally submitted and the failure to obtain its return would cause irreparable harm to the party who submitted the information or to the party in interest on whose behalf the information was submitted, and the information has not otherwise been made public. The petition fee set forth in 37 CFR § 1.17(g) has been paid.

The reasons set forth in this petition establishes to the satisfaction of the Director that expungement of the information is appropriate. The file entries for those documents have been closed and as such the documents are no longer publicly available, which is the IFW equivalent to removal of a paper document from a paper file wrapper. Also, as stated in M.P.E.P. 724, upon allowance or other action closing prosecution in an application, petition may be made for return of Proprietary information. The information will be returned to applicant.

Therefore, applicant's petition is GRANTED.

Should there be any questions about this decision please contact Marianne C. Seidel by letter addressed to Director, TC 1600, at the address listed above, or by telephone at 571-272-0584 or by facsimile sent to the general Office facsimile number, 703-872-9306.

The Examiner states the following as the reason for the Request for Information under 37 C.F.R. §1.105:

Applicant is claiming a seed comprising at least 50% of the genome of soybean line SG5322NRR, and soybean plants produced in methods that comprise performing crosses with soybean plant SG5322NRR. However, the instant specification is silent about what starting materials and methods were used to produce soybean line SG5322NRR.

Applicant has submitted a response to the Request for Information so as to expedite prosecution of the application.

3 (i). Original parental soybean lines used to produce soybean cultivar SG5322NRR:
FFR665 and FFR RT517

Other designations/denominations for parental soybean lines: None

Regarding the lineage of the original parental lines back to any publicly available varieties, Applicant submits that the lineage of the original parents of the present invention does not contain any public lines that are similar in genotype to the present invention.

3 (ii). Method and steps used to produce soybean cultivar SG5322NRR:

Modified Single Seed Descent

1) The F_1 generation was selfed and advanced to F_2 .

2) The F_2 generation was advanced to F_4 by using Modified Single Seed Descent.

3) F_4 and F_5 plants were selfed and selected in each generation. The instant invention was derived from F_5 experimental number line 48491.

4) The experimental line was then tested in replicated plots at many locations for 3 years before release.

3 (iii). Have parental soybean lines or progeny been disclosed or made publicly available?

FFR665 was publicly sold in 1995

FFR RT517 was publicly sold in 1997

3 (iv). Were any other soybean cultivars produced by the same method using the original parental soybean lines?

NO
